

## Business Commitment

The Intergovernmental Panel on Climate Change (IPCC), in its sixth report, has put the planet on red alert. Its report warns that unless there are immediate, rapid and large-scale reductions in greenhouse gas emissions, limiting warming to 1.5°C, or even 2°C, will be beyond our reach. This poses an existential threat for every stakeholder, including businesses. Enterprises therefore need to rise to the challenge through ambitious targets and collective action to address climate risks and build a resilient economy.

The CII Climate Action Charter (CCAC) has been designed to provide impetus for collective action by Indian businesses to drive solutions for a just, equitable and resilient transition. CCAC will provide a platform for Indian businesses to map climate change as a material risk and develop actions to build sustainable and resilient businesses, thus ensuring long-term competitiveness.

Our business acknowledges the responsibility and urgency to address climate change risks and the important role that we can play in accelerating action on climate change. (Name of organization) is committed to the CII Climate Action Charter for developing measurable targets in line with four principles.

### GHG Emission Reductions

Develop measurable short term (5 years) and long term targets for GHG emission reduction

### Transition in value chain

Support value chain in climate transition

### Building Resilience

Build resilience for future climate change impacts

### Mobilizing Green Finance

Accelerate green finance for climate transition

---

### (Name of organization) commits to the following:

1. Develop commitments to address material risks to business due to climate change
  2. Document GHG emissions across the value chain
  3. Support value chain partners in understanding and implementing climate actions to meet targets under the CII Climate Action Charter
  4. Report annually on the progress made towards the commitments
